⬢ Minitab Model Ops®

ML Model Lifecycle Management for Everyone

As machine learning use cases grow, the need to deploy and operationalize models has emerged. Introducing **Minitab Model Ops**, the ultimate ML Model deployment solution. Our latest product release helps business analysts and engineers successfully deploy their own Machine Learning and Predictive models.

Easy Model Deployment

Deploy your models effortlessly with a single click for immediate insights. Simply import models and store them in your own model repository. Every Minitab Model Ops model can publish to a REST API endpoint, making it easy to integrate into modern enterprise applications.

View Model Performance from Anywhere

Verify your models are performing from anywhere. Track key drift and stability metrics and set critical thresholds for each model. View model uptime, response time and deployment status. Get alerts in real-time as changes occur.

Production Model Governance

Deliver your models securely and ensure compliance with an audit log. Control access, track changes and create a traceable update history to ensure regulatory compliance and minimize audit risk.

Champion-Challenger

Ensure your process utilizes the best model with champion-challenger. Include candidate challenger models and elevate them when they outperform the existing model.

Bridge the gap between model creation and model production with a simple, yet powerful MLOps platform. Build your models in Minitab Statistical Software and deploy them in Minitab Model Ops.
